NOTE.—The two tables above (and other similar tables), must be read with some caution on account of changes of classification that were made before 1910, and at the end of 1930. From 1910 to 1930 the classification was substantially uniform. These tables are not affected by changes in classification made at the end of 1939.

* Deaths occurring at sea, or on foreign ships in Tasmanian waters, which were registered in Tasmania, are not included.

† Croup has been included with diphtheria since 1913.

§ Including, until 1939, arteriosclerosis in association with cerebro-vascular lesion; also cerebral apoplexy, except in 1940 only.

‡ These results are the arithmetic means of the rates for each of the five years.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA FOR THE YEAR 1947.

Atmospheric Pressure.—Mean pressure for 1947 did not vary appreciably from normal, being slightly below average. During January, February, April, and May, pressure was above normal, while in March, June, July, August, and October under average conditions obtained, with maximum departures from normal in June, when pressure was about 5 to 6 millibars below average. Normal conditions were experienced in September, November, and December. Noteworthy features of pressure were the energetic depressions in May, June, July, August, September, and in the closing three months of the year. Outstanding anticyclones were those active in April, May, and July.

Wind.—Strong winds to gales were a pronounced feature of the months of May, June (on the 17th power and light lines were interrupted in parts of Eastern and South-Eastern areas), July, August, September (on the 15th of this month some structural damage was reported in the South-East), October, and December.

Temperature.—Mean temperature for the year showed no marked departure from normal being slightly above average. Over average conditions obtained during February, March, April, May, June, and December, while sub-normal conditions were experienced in July, August, October, and November. In January over average temperatures prevailed in West Coast and South-Eastern divisions, but elsewhere under normal temperatures were recorded, and in September means were above normal over the Northern half and below normal in the Southern half of the State.

Frost.—Frosts were a feature of the weather in May, June, July, August, September.

Rainfall.—Substantial above average rains were recorded generally, and plus departures from district normals ranged from 17 per cent in the Derwent to 39 per cent in the South-Eastern divisions. At many stations in the Northern and South-Eastern sections the surplus was greater than 10 inches, outstanding being 21 inches at Ringarooma. At some stations in the West Coastal region more than 20 inches above the yearly average was registered, notably 36·24 inches at Waratah, where the yearly total was 122·85 inches, constituting a record for this place. Rainfall in both January and February was below normal, with appreciable deficiencies in several districts. March was a wet month generally, with excellent rains in Northern and South-Eastern districts. Sub-normal rainfall followed in April, while in May excellent above average rains were gauged in the Northern and South-Eastern areas. Heavy rains were experienced generally in June, and district averages were, in most cases, greater than 100 per cent above normal, the maximum being 203 per cent in the Derwent section. Some stations in Western, Northern, and South-Eastern divisions registered record June totals. Further heavy rains followed in July in the Northern areas. In August, rainfall was mainly above average, and in September chiefly below normal. Good rains were experienced generally in October, when about half the stations in the South-Eastern division recorded record October totals. A number of record October totals was also gauged in Northern and West Coastal divisions, notably 2222 points at Waratah. In November, excellent rains fell over the East Coastal areas, but rainfall was otherwise mainly below normal. Further good rains occurred in the East Coastal, Northern, and South-Eastern divisions in December.

Floods.—Heavy rains in mid-June caused serious floods in the Derwent, Styx, and Huon Rivers, and heavy damage to land and crops resulted. In July, heavy Northern rains caused floods in the South-East and interrupted communications. Further floods were experienced in the Derwent and Styx Rivers on the 5-6th August, and in October appreciable rains in the Northern districts brought consequential floods to the North Esk with stock losses. Substantial rises in Northern and Eastern Rivers were also experienced in November and December, and stock losses occurred.

Thunderstorms.—Severe thunderstorms on the North-West Coast on the 24th May caused damage. Some high intensity rainfall occurred with a thunderstorm in Hobart on the 18th December.

Crops, Pastures, &c.—Dry conditions in January and February did not materially affect stock, pastures, and crops. Excellent rains and mild temperatures in March maintained favourable seasonal trends, although winds caused some damage to hop crops. Deficient April rainfall did not affect the situation, as mild temperatures promoted growth. The outlook continued good in May with insufficient rainfall and mild temperature conditions. Heavy June rains and gales had an adverse affect on crops and stock, while waterlogged territory delayed farming operations fairly generally. Floods also caused serious damage to farming property and crops in the Styx, Derwent, and Huon Valleys. Chiefly above average precipitation in July did not improve the situation and further delayed farming activities. Mainly below average rains and milder temperatures in September resulted in some improvement in crops and pastures. However, excessive October precipitation retarded crop growth and resulted in some rotting and yellowing, and limited farming activity. Floods in the North Esk caused stock losses. Good rains occurred in the East Coastal division in November, with normal precipitation in the Northern division, otherwise crops benefitted from below average rainfall elsewhere and, although crops were backward, there was some improvement in this month, which was maintained in December, due to more seasonable temperatures, although rain was, for the most part, substantially above average.

Monthly Weather Summaries.

JANUARY.—Pressure was over 1 millibar above normal. Nine depressions were noted, two of which, active during the 6-8th and 28-29th, caused strong winds to gales and general rains of chiefly light to moderate character. A wind gust of 62 m.p.h. on the 6th was recorded at Hobart, 5 anticyclones or "wedges" were depicted. Mean temperature in the lower South-East and West Coastal divisions was about 1 degree Fahrenheit above average, otherwise district mean temperature was almost generally about ½ degree Fahrenheit under normal. Scattered frosts were reported in the Upper Derwent on the night of the 4-5th. District average rainfall was almost generally sub-normal, the departures ranging from minus 23 per cent in the Northern to minus 64 per cent in the East Coastal divisions. Several districts recorded rains which were 60 per cent or more under average. Normal rainfall was gauged at Currie, King Island. Scattered thunderstorms occurred in the Northern division on the 17th. Isolated thunderstorms were experienced elsewhere during the month.

FEBRUARY.—Mean pressure was about 3 millibars above average. Six depressions were noted, the only one of moderate intensity being that active between the 21st and 23rd. Five anticyclones of average intensity were identified. During the 12-15th strong, squally, South-Easterly to North-Easterly winds were experienced and bush fires occurred in the North-West. Strong North-Westerly to South-Westerly winds to gales in parts were recorded on the 21st-22nd. Some minor damage to yachts resulted during the latter period. Mean temperature generally was above the average, the plus departures ranging from 0·5 degree Fahrenheit in the North to 2·3 degrees Fahrenheit in the South. Frosts occurred generally on the Central Plateau on the night of the 19-20th. District averages were below normal in all divisions, the departures ranging from minus 25 per cent in the East Coastal to minus 60 per cent at Currie. In most sections the deficiencies exceeded 30 per cent below normal. The best general rain fell in the 24 hours ended 9 a.m. 17th, when moderate to heavy gaugings resulted. Thunderstorms occurred at a few places on the 3rd, 5th, and 7th, and on the 27th at a number of places in the South-West quarter of the State.

MARCH.—Notable features were a complex depression during the 9th-17th, the unusual path of a depression over Victoria and Tasmania between the 29th and 31st, and an intense "high" which formed two cells on the 23rd. Three depressions and three anticyclones were noted. Mean pressure was 1 to 2 millibars below normal. Strong North-Westerly to South-Westerly winds prevailed during the 14-20th, and on the 31st. Gales were prevalent over the Southern half on the 15th and 17th. Mean temperature was over normal in all divisions, mainly the result of warm nights. Warm to hot spells occurred from the 8th to 12th and on the 28th, while on the 20th, a rather cold day was experienced. Frosts were reported on the Central Plateau and at isolated stations in the Northern, Midlands, and Derwent Valley divisions on the 20th-21st. Fogs were rather prevalent on the 4th and 7th in a period of North-Easterly weather. Rainfall was above average generally, excesses ranging from 19 per cent in the Midlands to 63 per cent in the Northern divisions. Several general rains occurred. On the 6th almost all stations in the East Coastal division recorded falls of 2 to 2½ inches, the maximum being 3½ inches at St. Marys. Heavy amounts were also gauged in the North-Western half on the 1st, and in the South-Eastern half on the 5th-6th. Thunderstorms were reported at a number of East Coastal stations on the 5th, as well as at scattered places in the West Coastal, Northern, and Central Plateau sections on the 12th.

APRIL.—Chief features of pressure were the frequency, persistence, and vigour of the anticyclones, a complex "low" on the 1st, and a secondary depression which moved through the Straits on the 11-12th. Four depressions and four anticyclones were depicted, and the resultant pressure for the month was about four millibars above the average. Rather steep pressure gradients during the 14-17th caused strong, squally South-Easterly to Easterly winds over the Southern districts. Mean maxima were mainly about 1 degree Fahrenheit to 3 degrees Fahrenheit above average. Mean minima were also in excess of normal in the South-Eastern half and on the North-West Coast, but were about 1 degree Fahrenheit to 2 degrees Fahrenheit under average on the North-Western and Western highlands. Frosts occurred frequently on the Central Plateau and on a number of occasions on the North-Western and Western highlands and in the Upper Derwent sections of the State. Rainfall was below normal for each district, except King Island (Currie). The deficiencies were generally greater than 30 per cent, but ranged from minus 34 per cent in the West Coastal to minus 55 per cent in the East Coastal divisions. A surplus of 69 per cent was recorded at Currie. Several general rains occurred during the month, but the substantial gaugings were for the most part confined to the North-West of the State, although in the 24-hour period ended 9 a.m. on the 12th, moderate amounts were recorded in the South. The only thunderstorms were recorded on the 11th at scattered places in the South-Eastern and Central Plateau divisions.

MAY.—The month was noteworthy for two energetic depressions active on the 16-17th and 23rd-26th, and a vigorous anticyclone, depicted between the 29th-31st. Four depressions and three anticyclones were noted. Pressure was about 2 millibars over average. There were several periods of strong winds to gales, outstanding being on the 17th, when structural damage was caused in the South-Eastern division, and Hobart recorded a gust of 61 m.p.h. Mean temperature was about 2 degrees Fahrenheit to 3 degrees Fahrenheit above normal. Both day and night temperatures were mainly above average until the 24th, and below average thereafter. Frosts were recorded in all divisions between the 28th and 31st during a cold spell. Rainfall was practically normal in the Northern, East Coastal, and Western divisions, whilst a deficiency of 34 per cent occurred at Currie. Elsewhere district averages were in excess of normal, reaching 60 per cent above in the Midlands and 74 per cent above in the South-Eastern divisions. The best rains of the month occurred with a complex depression between the 24th and 27th, when moderate to heavy amounts were gauged in all divisions together with very heavy totals in Northern, Midlands, and South-Eastern divisions. Thunderstorms occurred in the Northern and South-Eastern sections on the 24th. These were severe on the North-West Coast, where some damage resulted. The first substantial snow falls occurred on the 26th.

JUNE.—Depressions were energetic and frequent. Three were outstanding. The first, active between 4-7th, moved from the New South Wales Coast; the second controlled the weather between 9-11th, whilst the third influenced conditions on the 15-17th. Six depressions and three anticyclones were noted. Mean pressure was about 5 to 6 millibars below normal. Several periods of strong winds to gales were experienced, noteworthy being those on the 15th, when forces of 8 and 9 were recorded at Cape Bruni and Maatsuyker Island respectively, and on the 17th when these stations reported forces of 10 and 11 respectively on the Beaufort Scale. Winds caused considerable interruption to light and power services in East and South-East Tasmania. On the 16th a gust of 71 m.p.h. was recorded at Hobart. On the night of the 23rd a severe storm in the Burnie area interrupted light and power services. Mean temperature was generally about 1 degree Fahrenheit above average. Low minima were recorded at many stations on the nights of the 20th-21st and 25-26th when frosts were widespread, being heavy in the Central and Northern divisions on the former occasion. District means were generally over average, in most cases more than 100 per cent in excess, but ranging from plus 82 per cent at Currie to plus 203 per cent in the Derwent Division. Record June totals were gauged at a number of stations in the Western division, as well as at some places in the Northern and South-Eastern sections. Heavy rains between the 15th and 17th resulted in serious floodings in the Derwent, Styx, and Huon Rivers, and losses occurred. Waratah recorded 483 points in the 24 hours ended 9 a.m. on the 6th. Heavy falls of snow were reported during the 16th-18th.

JULY.—The outstanding features of pressure were a vigorous anticyclone on the 2nd-3rd, and an energetic depression which caused heavy rains between 15th and 16th. Eight depressions and three anticyclones were identified. Several "lows" carried steep gradients, and strong winds were a feature. Gale force was reached at a number of stations during the month, notably during the 15-16th, when strong North-Westerly to Westerly winds to gales were experienced over a wide area, and Hobart recorded a gust of 56 m.p.h. Gales were also reported from the Central Plateau on the 22nd. Mean temperature was about 1 degree Fahrenheit below normal on the North-Western and Western highlands, otherwise slightly above average conditions obtained. Several cold nights occurred during the month when frosts were widespread. Rainfall in the Derwent division was 21 per cent below average, but elsewhere above normal figures were recorded, the surpluses ranging from 24 per cent in the East Coastal to 54 per cent in the Northern division. The best rains occurred in the 48 hours ended 9 a.m. on the 7th and 14th respectively. In the latter period mainly heavy to very heavy amounts were gauged over the Northern half and floodings resulted in Northern rivers, assumed serious proportions in the South Esk, and interrupted communications. Scattered thunder and hailstorms were reported in the Northern division on the 10th, and widespread snowfalls were experienced on the 17th.

AUGUST.—Pressure was about 3 millibars below normal. Eight depressions and six anticyclones were noted. Most of the depressions were active in the first half of the month, and the anticyclones during the latter half. Some depressions carried steep gradients and strong winds to gales were prevalent on a number of occasions, outstanding being the 4th, when Hobart recorded a gust of 71 m.p.h., gale force winds were recorded at a number of stations in the Southern half of the State, and minor structural damage resulted. Mean temperature was generally below average, mostly by about 1 degree Fahrenheit to 2 degrees Fahrenheit. There were several periods during the latter half of the month when nights were cold and frosts were recorded in all divisions. Normal rainfall was experienced in the Midlands, otherwise over average district rainfall was recorded, the excesses ranging from 18 per cent in the East Coastal to 41 per cent in the West Coastal divisions, and 46 per cent at Currie. Several general rains occurred during the first half of the month, the gaugings being moderate to heavy over the North-Western half, and floodings occurred in the Derwent and Styx Rivers on the 5th-6th. Snow fell generally on the 14-15th and the Mount Lyell Highway was blocked.

SEPTEMBER.—Depressions were frequent and vigorous, and eight were noted during the month, whilst four anticyclones were identified. The resultant mean pressure was about normal. A number of depressions carried steep gradients and caused strong to gale force winds, notably on the 5th, 8th, 10-11th, and 15-18th. During the 15th, gale force winds in the South-East caused some structural damage. Over the Northern half of the State mean temperature was about 1 degree Fahrenheit to 2 degrees Fahrenheit over the average, but elsewhere slightly plus and minus departures were experienced. During several periods minimum temperatures at many stations were under 40 degrees Fahrenheit, outstanding being on the 9-10th, 23rd-24th, and 29-30th, when frosts were recorded in most divisions. Rainfall.—A surplus of 18 per cent was recorded in the West Coastal division, but elsewhere district averages were below normal, ranging from minus 9 per cent in the South-Eastern to minus 47 per cent in the Midlands. The best general rains fell in the 24 hours ended 9 a.m. on the 3rd, 9th, 11th, and 29th. Snow fell fairly generally on the highlands on the 7-8th.

OCTOBER.—As in September, depressions were frequent and energetic, but only a few anticyclones were noted. A depression, active between the 14-15th, caused strong winds to gales and general rain associated with hail, snow, and thunderstorms. Eight "lows" and two anticyclones were identified. Mean pressure was about 1 millibar below normal. Some depressions carried steep gradients and strong winds to gales were experienced on several occasions, notably between the 14-16th and 20th-23rd, when gale force winds were widespread. On the 20th a gust of 57 m.p.h. was recorded at Hobart. Mean temperatures were about 1 degree Fahrenheit to 2 degrees Fahrenheit below average generally. The night of the 11-12th was cold, and frosts occurred in most divisions. Mild to warm conditions were experienced in the South-Eastern half of the State on the 18-19th. District rainfall averages were substantially in excess of normal, the plus departures ranging from 59 per cent at Currie to 151 per cent in the South-Eastern division. Record October totals were recorded at some stations in the Western and Northern sections, outstanding being 2222 points at Waratah, and about

RAINFALL IN DISTRICTS, 1947.

The rainfall during the year for the various districts, as reported by telegraph, is summarised in the following table:—

District.	Mean District Rainfall, 1947.	Average for Previous Years.	Percentage Departure from Normal.
	in.	in.	
Northern	52·80	39·65	33 % above normal
West Coast	121·24	98·75	23 " " "
Central Plateau	52·69	43·92	20 " " "
Derwent Valley	34·18	29·18	17 " " "
Midlands	27·53	22·09	25 " " "
East Coast	38·17	30·07	27 " " "
South-East	36·28	26·10	39 " " "
King Island	50·14	33·71	49 " " "

half the stations in the South-Eastern division experienced record October falls. Several general rains occurred and that recorded in the 24 hours ended 9 a.m. on the 31st was noteworthy for the number of one to two inch totals gauged in the South-Eastern section. Moderate to heavy rain over the Northern half between the 19th-21st caused some floodings and stock losses in the North Esk. Snow fell generally on the 15-16th and 22nd-23rd. Hail was rather widespread in the South-Eastern and Western divisions on the 15th, when scattered thunderstorms occurred in the Northern section.

NOVEMBER.—Mean pressure did not vary much from normal. Seven depressions and three anticyclones were identified during the month. A depression, active between the 4-5th, caused substantial rains about the North-East, culminating in appreciable rises in the Wye and South Esk Rivers on the 5th. Strong North-Easterly winds to gales were also a concommitant on the 4th. Strong South-Westerly winds to gales were noted on the 6th. Mean temperatures were about 1 degree Fahrenheit to 2 degrees Fahrenheit below average due to substantial minus departures from normal in day temperatures over most of the State. A cold day was recorded on the 9th, while warm to hot temperatures were experienced on the 20th. Several cold nights occurred and some frosts were reported from the Derwent and Central Plateau divisions. District rainfall in Northern and East Coastal divisions and at Currie on King Island was above average with plus departures ranging from 17 per cent in the Northern to 109 per cent in the East Coastal section; elsewhere sub-normal district averages were experienced, the deficiencies falling from 3 per cent in the Midlands to 31 per cent in the South-Eastern division. Several general rains were recorded, outstanding being those in the 24 hours ended 9 a.m. on the 4th and 5th, when a number of stations in the East Coastal division recorded amounts in excess of one inch on each day, and on the 19th, when useful falls were recorded in the South-Eastern half of the State. The chief snow falls occurred on the Central Plateau.

DECEMBER.—Three depressions were noteworthy for the month. One, active between the 2nd-3rd, caused heavy to very heavy rains in the East Coastal division, the second, active between the 20th-21st, influenced heavy rain generally and floodings in Eastern and Northern rivers; while the third (30th-31st), caused strong winds to gales over much of the State. Six depressions and three anticyclones were noted. There were several periods of strong North-Easterly to Northerly winds, noteworthy being on the 21st, when Maatsuyker Island recorded force 8, and on the 30th when Swansea experienced winds of similar character. On the 31st strong to gale force North-Westerly to Westerly winds were a feature, and Maatsuyker Island reported winds of force 9. Mean temperature was above average in the North-Western quarter and in the South-Eastern division, but elsewhere below normal conditions obtained. The nights of the 6-7th and 27-28th were cold and some frosts were recorded in the Central Plateau and Derwent divisions. Rainfall was slightly below average in the Western division, but elsewhere district means were above average, the surpluses ranging from 9 per cent in the Midlands to 126 per cent in the East Coastal division. A total of 1079 points at St. Marys was the second highest December total on record. The outstanding general rains occurred in the 24 hours ended 9 a.m. on the 3rd, when moderate to heavy rain fell generally, together with very heavy gaugings in the East Coastal section; in the 24 hours ended 9 a.m. on the 19th, when moderate to heavy amounts fell in the South-Eastern division, resulting in floodings and washaways in the Hobart area; and in the 48 hours ended 9 a.m. on the 22nd, when chiefly heavy totals were gauged with very heavy falls in the South-Eastern half and in the North-Western quarter. Heavy and scattered thunderstorms occurred on the 18th, and some high intensity rain fell in the Hobart area. As a result of the heavy rains in the South-Eastern half in the 48 hours ended 9 a.m. on the 22nd, floodings occurred in the Wye and South Esk Rivers and stock losses were reported in the South-Eastern section of the State.

The following is a summary of the Hobart monthly temperature and rainfall for the year 1947—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (Inches).	Normal Rainfall (Inches).
January	61·3	61·9	0·79	1·86
February	64·3	62·1	1·24	1·51
March	61·2	59·3	3·21	1·83
April	56·1	55·1	0·88	1·92
May	54·8	50·7	3·44	1·82
June	47·5	46·9	7·50	2·25
July	46·3	45·9	2·80	2·13
August	47·4	48·1	3·24	1·90
September	51·1	50·7	1·63	2·06
October	52·9	54·0	7·60	2·33
November	55·1	57·1	1·37	2·40
December	60·2	60·0	4·91	2·15
Year	54·9	54·3	38 61	24·16

The highest maximum temperature was 92·8 degrees on 20th January, 1947, and the lowest minimum 32·5 degrees on 27th July, 1947. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum is 27·0 degrees on 18th July, 1866.

1946–47	42,444	20,897	21,547	650	...	97·0

(*a*) Values calculated for the purpose of this table.

(*b*) The figures for oversea imports include an allowance for freight and other charges. This is not so for interstate imports. It is estimated, however, that the freight on the latter approximates £500,000 per annum.

IMPORTS—INTERSTATE AND OVERSEA, 1946-47.

SUMMARY of the Nature and Value of Imports from Australian States. Direct Oversea Imports by Countries of Origin.

COUNTRY OF ORIGIN.	NATURE AND VALUE OF IMPORTS.									
	CLASSES I.-IV. Food, Drink and Tobacco.	CLASSES V.-VII. Live Animals, Animal and Vegetable Substances.	CLASS VIII. Apparel, Textiles and Manufactured Fibres.	CLASSES IX. & X. † NOTE.—The figures given for each port in the last three tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 32.

PRODUCTION: MANUFACTURING—TASMANIA.

YEAR 1946-47.

(Figures in parentheses are those for corresponding period of 1945-46.*)*

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Australian schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

During the year 1946-47 returns were collected from 1169 (1082) factories, an increase of 87 compared with the preceding year. The large increase is a reflection of the extensive post-war development in manufacturing industry taking place in this State.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1946-47, 19,937 (19,235), showed an increase on the number for the previous year. For 1946-47 there was an increase of 1081 in the number of male workers, while the number of females decreased by 379.

Some of the more important increases in total numbers of workers are shown in the following industries:—Joinery, wood-turning, furniture, &c., 1043 (780); metal extraction and ore reduction, 2387 (2255); woollen, tweed, and knitting, 2563 (2291); newspapers, printing and binding, and paper-making, 1955 (1776); and motor and cycle works (including assembling), 953 (807). The main decrease was recorded in the jam, canning, fruit, and vegetable drying class, 1307 (1840).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1921.	1938-39.	1944-45.	1945-46.	1946-47.	1944-45.
1- 20 workers	35	34	25	27	29	18
21- 50 workers	27	15	11	14	13	14
51-100 workers	15	8	12	13	14	12
101 and over	23	43	52	46	44	56
Totals	100	100	100	100	100	100

During the year 1946-47 the percentage of all workers in factories with over 100 hands decreased to 44 (46), but the average number of hands in this class of factory increased to 436 (374).

The average number of workers for all factories in Tasmania during 1946-47 was 17·8, compared with 18·7 in 1945-46.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light and water; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, also, no reduction is made for depreciation owing to the impossibility of obtaining completely accurate and consistent figures.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1942-43.	1943-44.	1944-45.	1945-46.	1946-47.
	£	£	£	£	£
Output	18,703,930	20,848,210	21,356,984	22,119,305	24,569,748

	£	£	£	£	£
Net production per £100 labour cost	181	174	178	184	189

(*a*) Excludes amounts drawn by working proprietors.

The gross output for 1946-47 amounted to £24,570,000 (£22,119,000), and net production to £10,668,000 (£9,196,000). After deducting labour costs from net production, an "unallotted balance" of £5,030,000 (£4,189,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which gives the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the values declined in 1931-32 to approximately £2,808,000, but increased in subsequent years to £10,668,000 during the year under review. For each £100 expended in salaries and wages, the average value of net production was £181 in 1942-43; £174 in 1943-44; £178 in 1944-45; £184 in 1945-46; and £189 in 1946-47. The aggregate cost of raw materials rose considerably during 1946-47, and amounted to £11,325,000 (£10,308,000), representing 46 (46) per cent of the total value of the output.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.
	1942-43.	1943-44.	1944-45.	1945-46.	1946-47.	1945-46.
	£	£	£	£	£	£
Lime, cement, &c. (*a*)	200,535	199,268	192,443	253,244	311,056	237
Sawmills	577,380	524,194	601,753	642,105,	746,281	159
Metal extraction	1,583,045	1,703,714	1,727,545	1,812,179	2,452,997	268
Biscuits, confectionery, &c.	414,088	395,619	417,687	508,420	535,208	173
Jam, pulp, &c.	350,275	365,161	437,380	506,500	494,832	148
Woollen mills	973,721	1,028,577	843,948	849,005	976,241	149
Books, paper making, printing, &c.	1,157,641	1,257,448	1,193,799	1,252,810	1,432,127	210
Cycle and motor works	174,522	192,207	209,071	266,114	347,044	162
Heat, light, and power (excluding carbide)	247,201	183,933	200,297	219,362	170,001	256

(*a*) Including Carbide.

As may be seen from the table, the value of net production in 1946-47 was greater than in the previous year in most of the above industries, but particularly in the metal extraction, woollen mills, and books, paper-making, printing, &c., classes.

LABOUR COSTS.

The total amount of wages and salaries (excluding amounts drawn by working proprietors) for the year 1946-47 was £5,637,933, compared with £5,006,511 in 1945-46. The average payment to all male and female workers (excluding working proprietors), for the year under review, was £294 (£270).

FIXED CAPITAL.

At the end of 1946-47 the value of fixed capital investments stood at £14,178,000, compared with £13,535,000 at the end of the previous year. Of this fixed capital, £5,678,000 (£5,304,000) was represented by land and buildings, and £8,500,000 (£8,231,000) by plant and machinery.

(*a*) Collections at the Central Office (which for the whole of Australia amount to approximately one-third of the total) are not included.
(*b*) Actual Collections in Tasmania. The amount of duty collected in other Australian States on goods transhipped to Tasmania not included.
(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for Australia that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82 % of the average per head for Australia. Later years has been taken as approximately 80 %).
(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.
(*e*) Excluding Central Office Collections of Income, &c., Taxes.
(*f*) Including Flour Tax.

CONSOLIDATED REVENUE, 1941-42 TO 1946-47.

(a) Including Special Grants (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1947.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice existing prior to the year 1933-34 of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency prior to 1934-35, as shown above, to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1947.	£
Deficit as shown in above table	2,011,534
Losses on Returned Soldier Settlement	1,116,104
Loss on realisation of State Ships	61,260
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Other	113,687
Total	£3,432,930

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

GOVERNMENT EXPENDITURE ON PUBLIC WORKS, 1946-47.

Purpose.	Public Works Department. (a)				Hydro-Electric Commission from Loans and Reserves.	Total.

In the table above the separate Commonwealth and State totals are not adjusted, but the combined totals are shown adjusted and also unadjusted.

The duplications excluded from the adjusted figures include the following items:—Commonwealth re-imbursements on account of Income and Entertainments Taxes, Commonwealth payments of interest under the Financial Agreement, Special Grants by the Commonwealth and State payments of Pay-roll Tax to the Commonwealth. There are other duplications not allowed for—e.g., various payments from the Commonwealth to the States for services rendered and miscellaneous Commonwealth receipts from the States, totalling perhaps about £1,000,000 at the present time—and the adjusted figures are therefore still slightly overstated.

(*a*) Including periodic payments in reduction of principal.
(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/47. (*c*) Not collected.

1944. (*a*) From 1st July, 1943, the income limit was abolished and the rates payable were—(i) where there were no other children under 14 years, £5; (ii) one or two other children under 14 years, £6; (iii) three or more such children, £7 10s. In addition, an allowance of £1 5s. per week was payable for each of the four weeks immediately before and after the birth. This allowance was increased from 5th April, 1944, to £1 17s. 6d. per week when twins are born, and £2 10s. per week when triplets are born, while the ages of the children taken into account was increased to 16 years.

1947. (*b*) From 1st July, 1947, the allowances payable were as follows—(i) where there were no other children under 16 years, £15; (ii) one or two children under 16 years, £16; (iii) three or more children under 16 years, £17 10s. Where more than one child is born at a birth the allowance shall be increased by £5 in respect of each child born at that birth.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1946.

Hobart, 9th September, 1947.

SIR,

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1946.

(Note.—Figures in parentheses refer to the previous year—1945.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1945, showing the strength, progress, and financial position of the societies.

The returns relating to the year 1946 were examined as customary for compliance or otherwise with the Friendly Societies Act and the registered rules of each society. The result was pleasing, inasmuch as few irregularities were disclosed in the conduct of financial transactions.

Societies.

At the end of the year 1946, there were 20 (20) distinct friendly societies, exclusive of two dispensaries in Tasmania. The special societies, which consist of members of one firm or institution or of residents of one locality, and have no branches, numbered 7 (7), with a benefit membership of 21·4 (19·7) per cent of all societies. There were 13 (13) general societies with 147 (147) branches for males, 24 (23) for females, and 3 (4) for juveniles. During 1946, the Fingal branch of the I.O.O.F.M.U., Buckingham district, was absorbed by other branches; while two new branches of the I.O.O.F. Grand Lodge were formed at Bellerive (male) and Bushy Park (female). One juvenile branch of the I.O.R., Tas. district, closed during the year.

Membership.

The total membership at the end of the year 1946 was 23,728 (23,624), which comprised 22,474 (22,302) in adult male lodges, 1196 (1261) in adult female lodges, and 58 (61) juveniles, showing a decrease of 303 benefit members in general societies and an increase of 407 in special societies.

The number of initiations in general societies during 1946 showed a total increase of 115 for both sexes. These numbered 534 (415) in male lodges and 40. (44) in female lodges.

The average age of male members for 1946 was 46·9 (46·6), a slight increase on the figure for the previous year.

The following table shows the steadily increasing average age of adult male members of general societies from the year 1925 to 1946:—

Year.	Average Age.	Year.	Average Age.	Year.	Average Age.
1925	39·6	1937	43·0	1942	45·8
1930	40·5	1938	43·7	1943	46·1
1934	42·7	1939	44·2	1944	46·2
1935	42·8	1940	45·3	1945	46·7
1936	43·1	1941	45·5	1946	47·0

The following table relating to male members of general societies, which form the most important section of the total membership, shows very clearly, in another manner, the drift into the older age-groups:—

Age Groups.	1920.		1930.		1946.		1946 Members Distributed on Basis of 1920.
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	
16-19 years	1605	7·79	1463	6·60	469	2·70	1354
20-29 years	5445	26·42	5117	23·08	2361	13·59	4591
30-49 years	9859	47·85	9613	43·37	6878	39·58	8315
50 years and over	3696	17·94	5975	26·95	7669	44·13	3117
Total Members whose Ages were specified	20,605	100·00	22,168	100·00	17,377	100·00	17,377

Sickness and Mortality.

An increase in cases of sickness was experienced in friendly societies during 1946, the number in adult male lodges being 4046 (3952), while the duration of sickness in days increased to 259,269 (250,119). The average length of sickness per case increased to 64·1 (63·3) days. In female lodges the cases of sickness fell to 139 (197), and the days of sickness to 11,171 (13,045), the average length of sickness, per case, being 80·4 (66·2) days.

Details of sickness over the past six years are given in the following table:—

Year.	Cases of Sickness.	Total Duration.	Average Length of Sickness.	Sick Payments.	Sick Pay per Financial Member.
	No.	Days.	Days.	£	£ s. d.
1941	4471	288,848	64·6	25,780	1 1 7
1942	4577	285,002	62·3	25,554	1 1 1
1943	4232	269,358	63·6	25,372	1 1 0
1944	4185	269,682	64·4	26,094	1 1 11
1945	4149	263,164	63·4	26,293	1 2 10
1946	4185	270,440	64·6	25,997	1 2 5

During 1946 there were 339 (379) adult male deaths in friendly societies and 7 (8) female, making a total of 346 (387). The number of deaths of registered wives was 118 (160), the funeral payments relating thereto being £1644 (£2205).

Funds.

Exclusive of dispensary stock, valued at £6234 (£5907), accumulated funds by the end of 1946 amounted to £591,840 (£567,298), and the capital per financial member was £25 10s. 5d. (£24 12s. 9d.). The unusually large increase of £24,542 in the accumulated funds during 1946 resulted from the incorporation in the funds of the lodges of about £10,000, made available for distribution amongst the societies, from the surplus to the credit of the Friendly Societies War Service Insurance Fund. The Sick and Funeral Funds, in the main, received the benefit of this distribution. The rate of interest earned by the funds was 3·8 (3·9) per cent.

Receipts.

Net revenue for 1946 was £141,028 (£122,874), the chief items being members' contributions and levies £89,220 (£86,585); interest, dividends, &c., £22,345 (£22,117); and miscellaneous items £29,263 (£14,039).

Expenditure.

Of the net expenditure of £116,159 (£113,548), the greater part was distributed in payment of benefits for members, which totalled £85,662 (£87,298). These comprised £25,997 (£26,293) sick pay, £35,618 (£35,709) medical expenses, and £24,047 (£25,896) funeral donations. Of the remaining expenditure £20,382 (£19,522) represented cost of administration, and £10,115 (£6728) miscellaneous payments.

Further details under the several headings enumerated may be found on pp. 5 to 22.

Conclusion.

Previous reports have stressed the necessity for fresh legislation to bring the Act up to date, and each year that passes adds to the difficulty of maintaining the friendly societies on a satisfactory financial basis. A number of amendments recommended by the actuary in his report was recently forwarded to you for your consideration.

H. J. EXLEY,
Government Statistician and Deputy Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.
